

RECOMMENDATION

In recent years, the course of Tuina Therapeutics in Shanghai University of T.C.M. has gone through a series of advanced, innovative and effective research and reformation. With “one body and two wings” training objective, “earlier and more clinical practice” principle, and “introducing to clinical work in early stage and returning to textbook education later” principal line combining with master-apprentice teaching characteristic, the course has formed an integrated series of clinical practice education system from textbook education to clinical practice.

The course applies multimedia, PBL, bilingual, CBL, web-based teaching methods to textbook education and clinical practice. Teachers of the course have gathered plentiful related clinical data and former a database. They use these methods and data combining with textbook in the process of teaching, which enriches the teaching resources. To talk about the educational level of Tuina therapeutics in China, the course in Shanghai University of T.C.M. is now in a leading position. I believe that Teaching and Research Section of Tuina Therapeutics in Shanghai University of T.C.M. will turn out a grate number of qualified personnel for Tuina science in the future.

Professor Yang Ming-shan

Shanghai University of TCM

杨明山教授

上海中医药大学

2013-4-20

A handwritten signature in black ink, appearing to be the name of the professor, written in a cursive style.
