Hi! I am a TCM student currently studying acupuncture and tuina class by Professor Li Zhengyu. Professor Li Zhengyu has full of experience about acupuncture and tuina, he taught us not just something that is in the books but also stuffs that we should know for clinic and improving our acupuncture and tuina skills. For ~~exp~~ example how to talk and deal with patients, teach us how to do acupuncture and tuina correctly one by one. He shared his knowledge and experience freely and open, teaches us patiently and makes sure that we learned it.

He used to work oversea for a while and that is a reason why he understand us foreigners that sometimes we have hard times understanding Chinese, so he tried to teach slow for us to catch up. His Mandarin is easy to understand.

Overall I think he is the best acupuncture and tuina professor that ever taught us so far.
