To take, touch, pinch, roll, swing, rub, and some other massage techniques, so called massage, known as the most ancient medical skill in Traditional Chinese Medicine. To most of the students, it can be a dull subject if the teacher is teaching only based on the theories from the book. I have never thought of this subject can be so interesting and so useful under the lecture of Prof. Li. With all the respect, you can never judge the person by his look! He injected so much humor while teaching in classes. If you are first time walk in to his lecture, I bet, you will love message ~~it~~ and tuina. this subject. As a foreigner student, it's easy for me to follow his lecture and got what he means. As he has been giving lectures in foreign countries for years, he is experienced in dealing with all kind of students. He knows how to communicate to us.

He is someone who is truly involved in education. Instead of teaching us the theories from the book, he combining knowledge and experience into practice. Thus, we understand the meaning behind every move. Moreover, using message to cure "modern people illness", so that we know this skill is useful.

Frankly, when I back to my country, I make us of what I learned from prof. Li on my mum. She feels good! A true teacher is one who not only teaching you the knowledge, but the one who igniting your interest and passion to that subject. And he, Prof. Li, is the latter one.
