Through so many courses in learning the basics of Tuina and Acupuncture for the past three years, here comes the Acupuncture and Tuina Therapy. Professor Li is one of the lecturers who impressed me a lot among the Tuina and Acupuncture classes.

I'd never seen a Tuina lecturer teaching us and showing us the skills of Tuina practically by wearing a formal suit gently. Frankly it doesn't matter to our studies however his professional look and attitude caught my attention. I think it's important for a lecturer to get the attention from students in order to create a good communication and understanding in between especially we are the foreigner students in China.

He told us he worked in US for past few years and shared his practical experiences as a foreigner there while serving as a Chinese physician in US with all of us. He

also demonstrated the Tuina skills very professionally and corrected our mistakes on the spot. His vivid demonstration increased my interest in doing Tuina on patients and his humor sense while teaching enriched our course and atmosphere in class.

Lastly, I do learn a lot of knowledge and practical Tuina skills from Doctor Li through these few weeks and hopefully I could meet him again to ask for more extra knowledge and also his working experiences in overseas.
